This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

THE PRIMARY ELECTION OF SEPTEMBER, 1908.

PART I.

The following pages contain a summary of the arguments for and against the direct primary. The *first object* has been to present the points upon which practically all are agreed. The *second object* has been to present, with absolute impartiality, the opposing views on those points upon which the advocates and opponents of the direct primary differ. In this portion of this report, care has been exercised not to indulge in arguments or theories of our own. Hence the arguments on neither side have been extended beyond the scope of the observations of active partisans, as actually reported in newspapers, or as presented in formal documents submitted to this Bureau.

The arguments are here arranged under the following topics:

I. The voters.

II. The parties.

III. Party organizations and bosses.

IV. The newspapers.

V. "Special interests."

VI. The nominees.

VII. Expenditures of candidates.

VIII. Amendments proposed.

I. Voters.

Substantial agreement could probably be secured on several points with reference to the relation of the voters to the primary. It is claimed, and not disputed, that the direct primary brings the voters and representatives closer together; and that the educative effect upon the citizen is good, *to the extent that he can arrive at the truth.* On both sides, the excessive use of money is deplored, since it prevents voters from choosing impartially between candidates.

The disputes as regards voters are in the main two: 1st, whether or not the people are as well qualified by judgment and information to select candidates as are their party leaders, and 2nd, whether or not the people manifest sufficient interest in choosing nominees.

(1) The first must remain a matter of opinion,—or perhaps a matter of one's habitual confidence, or lack of confidence, in the voters,—until there has been a longer experience under the newer method of nomination.

(2) The second question is a statistical problem, which we examine elsewhere in this report.*

It is argued on behalf of the direct primary that it

(1) is a better vehicle of public opinion than the caucus and convention, and that

(2) it has awakened in the general public an interest in nominations, and

(3) aroused voters to a keener interest in political issues. These results are held to have followed from the claimed facts that the primary

(4) brings the people nearer to the government, and that

(5) it brings them nearer to their representatives,

(6) making the latter more responsible to their constituents.

(7) Moreover, the voter now has two chances at a candidate instead of one. The strongest emphasis, perhaps, is that laid upon

(8) the asserted effectiveness of the primary in educating the voters for citizenship, in contrast with the tendency of the caucus and convention to train politicians for office-seeking.

---

* See below, pages 268–70.

Even the prodigal expenditure of money has its hopeful aspect, for it is argued that

(9) money is now used to educate, rather than to corrupt, and it is felt that

(10) publicity as to expenditures has so aroused the public that a limit to campaign expenses will soon be established.

The opponents of the direct primary

(1) dispute the claim that it has increased public interest in political affairs, and they maintain that the reverse is true. They cite the

(2) small attendance at the primaries, as compared with that at elections, and attribute the apathy thus indicated to

(3) the cumbersome and prolonged contest, to

(4) the general lack of acquaintance with candidates, except possibly those for local offices, to

(5) the difficulty of getting the truth about men or measures from impartial sources, and to

(6) the opinion that it is hopeless for a candidate to prevail by merit or argument against a strong personal organization or combination, backed with plenty of money.

II. Parties.

The arguments most emphatically urged against the direct primary are that under it each political party is undermined by its rivals, and demoralized within.

(1) That there has been intermingling, or participation of members of one party in the primaries of another, is openly or tacitly admitted and frequently apparent, but even the staunchest party men are unable to make much of this fact as an argument, since it was neither difficult nor rare under the old system to pack or capture caucuses and conventions through the aid of voters notoriously of the opposing party. Indeed, 'the Republican electors of Wisconsin and *all voters without regard to past political affiliations* who believed in Republican principles' were invited to unite in sending delegates to the last state convention before the primary law went into effect.* We give elsewhere a few statistics on the lack of party regularity at the

* The call is quoted in "Cases and Briefs," Vol. 769, p. 3. Italics our own.

primaries.* There will be general interest in the operation of the recent amendment which requires 20% of the regular party vote to give a nomination, but there has not yet been any opportunity to test it.

(2) The complaint is made that parties have suffered from within, as a result of the primary. It is urged that party principles no longer control, having given way to purely personal politics, and the charge is preferred that the direct primary has been responsible for party turmoil, trouble, cliques, cabals, and intrigues; for weakened and disorganized parties; and for a practical paralysis of political committees.

In defense of the primary it is submitted

(1) that there has never been a very sharp contrast between the principles of the large parties as far as concerns state affairs,

(2) that, in fact, the direct primary has tended to give vitality to certain principles, by encouraging independence of judgment and of action, both on the part of office holders and of constituents, whereas blind party loyalty too often resulted in repressing progress,—needed reforms being stifled by both parties because tending to disturb party harmony and regularity.

(3) Insofar, therefore, as the direct primary has infused vigorous statemanship into the party platforms, the friends of the new system of nomination are ready to assume on its behalf, responsibility for its share in disrupting parties, but they insist that both before and after the primary, disintegration of parties has chiefly resulted from controversy over public questions.†

(4) Finally, it is even contended by some of the friends of the primary that it has improved party harmony, and tends to perpetuate parties, for the reason that reforms can now be brought about within the party, instead of necessitating resort to new parties.

---

* See below, pages 270 ff.

† The Democratic party, in this as in other states, was split in 1896 before the primary law; and the Republican party has recently been split into factions, by the growth of the La Follette following, before the primary law, and by disagreements within that group, since the primary law.

III. Organizations.

On the subject of the party bosses and machines, there are many points of substantial agreement:

(1) The boss no longer dictates.

(2) The boss cannot eliminate candidates.

(3) The power of the boss and of the machine is not broken.

(4) There is a tendency toward a number of machines within a party, rather than one.

There are, to be sure, those who hold that the boss-system is abolished, and those who think that the boss has a greater opportunity than ever. These, however, are extreme, rather than representative, views.

IV. Newspapers.

On the influence of the press in primaries, and on the influence of primary and general elections upon the press, opinions are also fairly accordant:

(1) The press has been very influential, and

(2) it still has political influence, but

(3) it is rapidly losing its authority because of the conviction that its opinions are bought. Finally,

(4) this loss of public confidence is, fortunately, in all probability, only temporary, and as newspapers come to realize what they are sacrifising by their venality, they will take pains to restore themselves in public favor by exercising more care, and conscientious scruple about what they print. Already, it is pointed out, as a sign of budding conscience, that some newspapers have begun to state frankly what material in their columns is paid matter.

V. "Interests."

Some advocates of the direct primary maintain that it has practically removed the domination of politics by special interests, such as railroads, public service corporations, and liquor interests. Some opponents, on the other hand, urge that the "interests" can now more readily concentrate their influence

and their financial support upon one candidate. Neither contention is frequently made, and, upon the whole, it would seem that there is little conclusive evidence upon which to base either.

VI. Nominees.

The main questions of interest, with respect to candidates, relate to their character, their responsibility, their number, and their distribution.

A comparison of opinion seems to show that there has been slight change either for better or worse in the character of nominees; that the number of contestants has decreased rather than increased; and that there is less opportunity for a deliberate geographical and racial distribution of nominees for the various offices.

Advocates of the primary maintain that

(1) The candidates now are at least as good as, perhaps a trifle better than, under the old system. While not disposed to set up a claim to any extraordinary degree of superiority, they attach great importance to the

(2) direct responsibility of public men to the people, instead of to intermediate politicians. This, they point out, would be a useful achievement, even though it were demonstrated that the quality of the candidates were not improved. It is stated that

(3) while it is comparatively easy to secure a nomination under the new law, the number of aspirants has decreased, rather than increased.

(4) A final advantage urged, is that in the selection of candidates absolutely no heed is paid to geographical or racial distribution. City has no advantage over country,* and there can be no effort to apportion candidates among different localities or districts or among different race groups. This prevents the selection of men on artificial grounds, instead of for personal fitness, and hence is likely to give better public servants.

The opponents of the primary system claim

(1) that the better men are discouraged from competing, and

(2) that the friends of defeated candidates are much more likely to "knife" the party nominee.†

---

* Attention is called to the fact that none of the present state officers happens to have been drawn from the largest cities. See also below, page 279.

† See below, pages 271–5.

VII. Expenditures.

Both advocates and opponents agree that

(1) the lavish expenditure of money is deplorable. Opponents regard this as the great evil of the primary system, and advocates of the primary, while not acknowledging that this is a necessary accompaniment, are ready to admit that reform in this particular is absolutely essential. If the direct primary were accepted as a permanent institution, it would probably not be difficult to secure nearly unanimous support for substantial legislation to restrain and regulate campaign expenditures. It is significant, also, that friends and foes of the primary, while deploring heavy financial outlays, unite in affirming

(2) the legality and legitimate character of most of the expenditures. The complaint relates to the *sum* of the expenses, rather than to the nature of individual items. Outlays which are innocent in themselves may and do, in the opinion of practically all, become demoralizing to constituencies when applied on a wholesale scale. Were every voter hired as a campaign worker, every vote would, by implication, be bought. A limitation is not to be objected to, therefore, even theoretically, on the sole ground that it must of necessity be an arbitrary one. Even if lavish expenditure were not harmful to constituencies, it would be undemocratic in its tendency, since it prevents poor men from competing successfully.

Opponents of the primary profess pessimism as to the prospect of satisfactorily solving the question of expenditures. They say that such outlays have increased enormously in recent years, and ascribe this fact to the primary system. They fail to see, moreover, how legislation can improve the situation materially, since, as they think, a legal limitation would simply result in money being spent in advance of avowed candidacy.

Defenders of the primary are more optimistic. Some of them hold that the use of money is no greater than before, only it is revealed more completely, now. Others, while agreeing that the present system is more expensive for the candidates, directly, hold that this is offset by the fact that the *party* spent more under the convention system. Others are disposed to admit that expenditures have risen, but they say that the expenses were rising before the primary law went into operation, and

they are not persuaded that the primary law has anything to do with the increased expenses.* The excessive use of money, they argue, is not at all due to any imperfection of our nominating machinery, but to the lack of a strong corrupt practises act. Even the heavy expenditures lately reported have a hopeful significance for them. The primary expenses, they believe, reduce the election expenses. Whatever money is used, whether more or less than before, is now directed to the education, instead of to the corruption of voters. Money before surely won, they maintain, but now it is not so certain to do so, and the recent outlays have so aroused the public that publicity will, they surmise, work a large part of the needed cure.

VIII. Amendments.

(1) Most thoughtful citizens desire a strong corrupt practises act, of which, in the opinion of the majority, some limitation of expenses should be one of the essential features. This is needed to prevent abuses in the primaries, but is equally needed to prevent abuses in the general elections.

(2) A considerable number of citizens evidently favor requiring voters at the primary to name their party, so as to prevent them from participating in the affairs of their opponents. There are serious objections, however, to such a requirement, which interferes with the secrecy of the ballot. Moreover, there is nothing to indicate that such an amendment is needed, and the provision recently adopted, requiring 20 percent of the party strength to secure a nomination should be thoroughly tried before experimenting with any other measure designed to confine voters to their party lines.

(3) Another amendment that is urged, but not very generally, is the abolition of the candidate convention.

(4) The amendment which many friends of the primary regard as most urgently required for the success of the primary is a second-choice provision, whereby the votes for the least

* Trustworthy evidence as to expenditures is difficult to obtain, except for late years. Of recent instances, the ones that have attracted most attention have been the $107,000 expended under the *primary* system in Wisconsin by Senator Stephenson,—and the $250,000 expended by Mr. Hearst after being nominated for governor of New York under the *convention* system.

successful candidates may be redistributed among the others till a majority of votes is secured for one man. It is objected to the "second-choice," or preferential, system, that it is complicated, and that the ballot is already sufficiently mysterious to the voter. It is also argued that the minority faction might, by their second choices, cause the nomination of a candidate of the majority faction who did not fairly represent the wishes of the majority of the larger faction. Finally, it is maintained that where a principle is at stake neither of the opposing factions requires the dictation of a boss or machine to prevent the cause being lost by the rivalry of candidates of the same faction; and that where there is no issue, a plurality nomination is nearly as acceptable as that of a majority.

Those who are urging the second-choice arrangement, however, answer the argument of complexity, by pointing to the successful operation, in Australia, since 1889, of a system which differs from the one proposed only by being a trifle more complicated. Returning officers can be given clear and unequivocal instructions, and there can be little difficulty in explaining to the voter how he may register his second choice if he cares to do so. The advocates of the measure are not satisfied that it has been possible, in this state at least, to eliminate candidates even in the face of a vital issue.

(5) It has been suggested that party nominations be altogether abolished, and non-partisan nominations by petition substituted. We have already arrived at the point where our judiciary nominations are non-partisan, but there is little reason to hope that the time is yet ripe for non-partisan choices for legislative and administrative offices in county and state affairs*.

* As this report deals only with the September primary, we do not undertake to consider the problem of municipal nominations.

PART II.

The foregoing pages have dealt with matters of opinion. While about half of these opinions possess all the authority that practical unanimity can confer upon them, few of them are susceptible of statistical verification. In the succeeding pages, however, several important questions are raised, to which the primary election returns, filed in this office, furnish definite answers. These questions are

I. What proportion of voters attend the primary?

II. To what extent do members of one party go into the primary of another party?

III. To what extent have nominees been the choice of a majority?

IV. What has been the influence of the alphabet in determining nominations?

V. What has been the attitude of the electorate toward candidates not selected at party primaries?

VI. To what extent are city populations disproportionately represented at the primaries? And to what extent do they control nominations?

I. What proportion of voters attend the primary?

Comparison of the primary vote with that of the general election in 1908 shows that about half of the voters at the general election had voted at the primaries. The largest vote cast at the primary was that for sheriffs which was 53.4% of the vote for the same offices at the general election. The lowest per cent was for the attorney general, which was 39.96 per cent of the ensuing November vote.

The highest vote at the primary on the Democratic ticket as compared with the general election vote was 24.80 per cent for

governor and the lowest was 21.24 per cent for attorney general. On the Prohibition ticket there were few regular candidates for county offices, so that the contests for state officers should be compared. The vote at the primary averaged about 16.75 per cent of the general election vote for all officers. On the Republican ticket the contest for the office of sheriff brought out the largest number of voters, and the vote at the primary for sheriffs represents 78.84 per cent of the vote cast at the regular election. For governor 65.54 per cent voted, and the lowest vote for a state officer was 56.08 per cent for attorney general. The Social Democrats seem to have voted a straight ticket and a comparison of the primary returns with the general election vote shows that about thirteen and one-half per cent of the November voters of this party voted in the primary.

The census of 1900 gives the latest figures attainable regarding the males of voting age in Wisconsin; that number is 570,715. A comparison of these figures with the primary and general election vote shows that 36.17 per cent of all males of voting age went to the primary and 78.79 attended the general election. Following the same method as used by the U. S. Census Bureau to estimate increases in population we estimate that the number of males of voting age in Wisconsin in 1908 was 662,029. The primary election vote is 31.18 per cent of this number and the general election vote 67.91 per cent, showing that approximately one-third of all adult males attended the primary and two-thirds attended the general November election.

TABLE I.—*Showing per cent primary vote was of general election vote.*

Office.	Democrat.	Prohibition.	Republican.	Social Democrat.	All parties.
Governor	24.80	16.65	65.54	14.28	45.91
Lieutenant Governor	21.57	16.67	62.82	13.90	43.59
Secretary of State	23.45	17.17	56.85	13.73	41.18
Treasurer	22.59	16.88	61.62	13.90	43.58
Attorney General	21.24	16.87	56.08	13.74	39.96
Insurance Commissioner	22.19	16.60	57.75	13.74	41.63
County Sheriff	23.51	33.17	78.89	13.19	53.40
County Treasurer	22.56	26.45	65.18	12.64	46.66
County Clerk	22.86	26.48	68.16	13.00	48.41
District Attorney	22.66	37.58	67.80	10.62	49.73
Register of Deeds	23.07	36.94	68.02	12.63	48.50
Clerk of Court	22.15	24.64	63.46	12.61	45.65
Coroner	22.30	17.52	49.57	11.40	36.32
Surveyor	23.60	32.48	50.47	20.92	42.61

Although the election for the office of United States senator seemed to attract the greatest attention at the time of the primary, the vote for United States senator was not as large as the vote for one of the county offices in which the large number of candidates and their active local campaigns seem to have especially interested the voters. The entire vote of all parties for United States senator at the primary was 224,793. The contests for the nomination as sheriff brought out the largest number of candidates and the greatest number of voters. The total vote of all parties in all counties for candidates for the office of sheriff was 234,293, or 9,500 more than all candidates for senator. This indicates that to 9,500 voters the interest in the senatorial contest was a matter of relatively little interest.

II. To what extent do members of one party go into the primary or another party?

The extent to which members of one party vote in the primary of another party cannot be determined even approximately. It is clear, however, that the returns of 1908 furnish no statistical confirmation of the suspicion that party irregularity is due to unfriendly invasion of a party primary with the purpose of helping to select a nominee weak enough to be easily defeated. Moreover, as it is impossible, even by scratching, to aid any Republican candidate in the primary by the use of a Democratic ballot, or *vice versa,* it is hardly reasonable to suppose that any considerable number of voters would see the expediency of making such ineffective use of their voting privileges.

Such evidence as we have tends to support the conclusion that party irregularity,—real and apparent,—is due, whenever it occurs, to one or more of the three causes following:—

(1) To circumstances in which the interest in a primary contest for some one office is so extraordinary that on its account some voters are willing to abstain entirely from participation in the primary of their own party.

(2) To a genuine reversal of opinion by voters as to the desirability of a nominee whom they have helped to select. (This need not always be due to positive dissatisfaction with the nominee. It may be due simply to a sense of the superior qualifications or claims of the nominee of another party.)

(3) Finally, it is most frequently due to the fact that the nominee, though receiving a plurality of the votes, was not acceptable to the majority of the party, some of whom voted against him in November, notwithstanding his somewhat feeble endorsement by the party in September.

The contest for United States senator offers no evidence of intermingling. Here, if anywhere, we should expect to find such evidence, for the Republican contest was one of unusual interest. Yet nearly 7,250 voters who took the trouble to cast Republican ballots neglected to express, at the same time, a choice among the Republican candidates for United States senator. It is true that the Republican vote for senator brought out a much larger proportion of the party than was the case in the Democratic ranks. Thus the Republican primary vote for United States senator was 73.8 per cent of the vote for Republican presidential electors in November, whereas the corresponding percentage for the Democrats was only 22.8 per cent. This contrast, however, only reflects the naturally keener interest in the primary taken by members of that party which alone hopes to secure the election of its nominees. As will be seen from the supplementary tables below, the Republicans bring out from 50 to 80 per cent of their strength at the primaries, while the Democrats are represented at the primaries by only 20 to 25 per cent of their number.

As none of the contests for state offices reveals any confusion of party lines, we turn to the county contests for evidence. It is obvious that in all cases in which the party vote of November exceeded that of September, it is impossible to demonstrate party irregularity even if it existed. But a fruitful source of inquiry will be found in those cases in which there were more votes of a particular party at the primary than at the general election. This is a reversal of the usual relation, and some peculiar circumstances must be supposed to exist in each such case.

There were 41 instances of this sort in the Republican party, but none in any other party. Thirteen of the instances related to the office of sheriff, and six to the office of district attorney. These may be selected as typical, and tables are herewith presented to substantiate the observations which follow.

TABLE II.—*Republican primary and general election vote in all counties where the total Republican primary vote for all candidates for the office of sheriff was greater than the successful candidate received at the election.*

COUNTY.	PRIMARY ELECTION.			Vote received by the Republican nominee at election.	Per cent primary vote was of general election vote.
	No. of candidates.	Total vote for these candidates.	Per cent nominee's vote was of total.		
Ashland	7	2,415	26.87	2,253	107.2
Chippewa	6	3,505	27.96	3,040	115.3
Columbia	4	3,779	27.96	3,489	108.3
Douglas	5	4,554	34.12	3,268	139.3
Forest	4	1,309	35.14	913	143.3
Iron	4	1,455	36.63	1,139	127.7
Juneau	6	2,640	43.33	2,529	104.4
Lafayette	5	2,524	32.69	2,331	108.3
Marinette	4	4,277	39.46	3,923	109.
Oconto	4	2,626	30.69	2,465	106.5
Oneida	7	1,514	24.17	1,276	118.7
Taylor	3	1,539	38.99	1,377	111.8
Washburn	3	1,243	35.80	1,133	109.7

TABLE III.—*Republican primary and general election vote in all counties where the total Republican primary vote for all candidates for the office of district attorney was greater than the successful candidate received at the election.*

COUNTY.	PRIMARY ELECTION.			Vote received by the Republican nominee at election.	Per cent primary vote was of general election vote.
	No. of candidates.	Total vote for these candidates.	Per cent nominee's vote was of total.		
Florence	2	625	58.55	558	112.0
Forest	2	1,252	52.31	1,074	116.6
Iron	2	1,238	64.05	1,157	107.0
Marinette	4	4,281	49.79	3,359	127.4
Washburn	2	1,211	55.99	1,084	111.7
Winnebago	6	6,769	29.53	5,892	114.9

The remaining instances include 8 contests for register of deeds, 4 for county clerk, 3 each for county treasurer and clerk of circuit court, and 2 each for coroner and surveyor.

Five counties, Douglas, Forest, Iron, Marinette, and Oneida had Republican contests with this outcome in half or a majority of the county offices. It can scarcely be supposed, in these counties at least, that a desire to undermine a party can account for the phenomenon we are considering, for in these counties the Republican majority is large, and in most cases overwhelm-

ing. It is only with reference to an occasional contest with exceptional accompaniments, that the charge of undermining can have any plausibility. In these counties, to have voted for weak Republican nominees for four or more of the eight offices would have been equivalent to voting in, not merely Republican office holders, but poor one at that,—which cannot be presumed to be the desire of any voter.

For the state as a whole, practically 80 per cent of the November Republican vote for sheriff was polled in September also. It will therefore be seen that any circumstances which gave extraordinary interest to the primary, or which detracted from the interest of the November election, might easily change the usual relation and cause a heavier vote in September than in November. In one of the counties in question, Lafayette, the Republican nominee failed of election. He had been one of five candidates for the nomination, and the rivalry had been keen between three of the candidates, so that the nominee was the choice of less than a third of the Republicans voting, and in November many Republicans refrained from voting for sheriff or else voted for the Democratic candidate, with the result that the latter was victorious.

In practically all the other instances the Republican nominee won in November by a comfortable margin, which doubtless would have been increased had the Republicans feared the result. This is sufficient to account for a light vote for the office in November, while the large number of candidates and the close contests (indicated by the fact that in only one of these instances did the nominee receive 40 per cent of the vote), are sufficient explanations of the heavy primary vote.

In the contests for district attorney, the explanation for a heavier primary than November vote is to be found in Florence, Forest, Iron, and Washburn counties, in the fact that there were very close contests between two candidates at the primaries, and no Democratic contestant in November. In Marinette the failure of the Republicans to obtain as many votes for district attorney in November as in September did not differ from their experience in four other offices in that county. This phenomenon may be accounted for by the fact that this county is the residence of the successful candidate for United States senator, and the Republicans betrayed much more interest in the Septem-

ber than in the November election. There were 4238 Republican votes for United States senator in Marinette in September, and only 3454 votes for Taft in November, whereas for the state as a whole, the Republican candidates for senator received only 182,915 as against 247,747 votes for Taft.

The only county left to be accounted for is Winnebago. Here there were six Republican candidates, and the nominee received about 30 per cent of the party vote in September. This contest had been so eager that there were more Republican votes for this office than that of sheriff or any other office. The Democrats, on the other hand, had selected, by a very small, uncontested vote, a man for district attorney who was possessed of much wider experience than the Republican nominee. The voters had little means of judging the qualifications of the latter, and caution ultimately triumphed over party claims, and so many Republicans who went to the polls in November, either refrained from voting for district attorney or voted for the Democrat, that the Republican nominee was defeated. The Republican vote for this office, which had been largest in September, was smallest in November.

In all the instances, among the other offices, of failure to poll a larger vote in November than in September, there was either a keen contest in the primary, or no contest at the general election with a single exception wherein the Democratic candidate was successful, while the Republican candidate received the lowest vote on the ticket. In this case we were informed that Democrats had participated in the selection of a weak candidate, but upon investigation we are satisfied that this was not the case. There had been, in fact, no contest for this office in either party, and the victory of the Democratic nominee was due to sympathies aroused which were unconnected with the qualifications or the popularity of the respective candidates.

There were no instances in which the primary vote of a party for state senator exceeded that of November. In the Republican party, there were 8 such instances with respect to assembly contests. The most conspicuous case is that of the first assembly district of Marinette. The large primary vote in Marinette county has already been explained. Second in importance is the case of Trempealeau county. Here the defeated candidate for the Republican nomination ran as an independent, receiving 2,000 votes which were actually, but not nominally, Republi-

can. In Douglas county, in the first assembly district of Sauk, and the first of Winnebago, the nominees were unacceptable to a large faction, and many refused to vote for them. In the case of Sauk, the Republican nominee was defeated. In Ashland and Juneau, the primary vote was only slightly in excess of that at the general election.

TABLE IV.—*Republican primary and general election vote in all counties where the total Republican primary vote for all candidates for the office of assemblyman was greater than the successful candidate received at the election.*

COUNTY.	PRIMARY ELECTION.			Vote received by the Republican nominee at election.	Per cent primary vote was of general election vote.
	No. of candidates.	Total vote for these candidates.	Per cent nominee's vote was of total.		
Ashland	3	2,170	44.8	2,118	102.4
Douglas (1st)	3	1,873	45.1	1,581	118.4
Douglas (2d)	2	2,252	53.3	2,045	110.1
Juneau	3	2,245	43.1	2,211	101.5
Marinette (1st)	2	1,975	53.2	1,312	150.5
Sauk (1st)	3	1,797	47.4	1,474	121.9
Trempealeau	2	2,824	54.6	2,162	130.6
Winnebago (1st)	3	3,054	50.9	2,590	117.9

III. To what extent have nominees been the choice of a majority?

The vote for United States senator was distributed as follows among the candidates of each party:

TABLE V.

S. A Cook	received	26.15%	of the	Republican	vote.
F. E. McGovern	"	23.31%	" "	"	"
Wm. H. Hatton	"	18.44%	" "	"	"
Isaac Stephenson	"	31.07%	" "	"	"
Neal Brown	"	66.53%	" "	Democrat	"
M. E. Hoyt	"	32.62%	" "	"	"
Jacob Rummel	"	91.43%	" "	Social Democrat vote.	

The vote for United States senator on the Republican ticket by counties was as follows:

TABLE VI.—*Showing number of counties carried by each candidate:*

	Majority.	Plurality.
Cook	5	19
McGovern	1	9
Hatton	0	4
Stephenson	5	38
	11	70*

Table VII shows that when there were three or more candidates for county offices only two out of seven were nominated by a majority vote on the Democratic ticket and eighteen out of 99 on the Republican ticket.

TABLE VII.—*Showing number of candidates who were nominated by plurality or majority vote when there were three or more candidates.*

No. of Candidates.	Democratic.		Republican.	
	Plurality.	Majority.	Plurality.	Majority.
3 candidates	3	2	41	16
4 candidates	3	.....	31	2
5 candidates	1	.....	15	.....
6 candidates	.....	.....	8	.....
7 candidates	.....	.....	3	.....
8 candidates	.....	.....	1	.....
Total	7	2	99	18

In the Republican primary for county officers in the 71 counties, 536 candidates were nominated out of a possible 568. In thirty-two cases the Republican party failed to nominate a candidate. There were 246 contests in which two or more candidates sought the nomination. The largest number of candidates for one office was eight for the office of sheriff in Polk county, where the nominee received 20.25 per cent of the primary vote. Of the 246 contests in the Republican primary the nominee failed to secure a majority vote in 101 cases or about 41 per cent of all contests. Of all the nominations the candidate named failed to secure a majority vote in 101 out of 536 or 18.8 per cent. The Democratic party nominated 408 county candidates out of a possible 568, and of these 408 nominations there were only 39

*Pepin county was a tie between Cook and Hatton, each getting an equal number of votes.

case, in which contests between two or more candidates developed.

In the Republican primary for the assembly, contests occurred in 55 out of 100 districts and of the 55 contests the nominee failed to receive a majority vote in 17 cases. In the 100 assembly districts 15 contests between two or more Democratic candidates arose and in all cases the nominee received a majority vote.

The primary returns show no contests in the Democratic party for the election of members of the senate in the 17 districts in which elections were held this year. The Republican returns show nine contests and in all nine the nominee received a majority vote.

IV. What has been the influence of the alphabet in determining nominations?

At the Republican primary there were 218 contests for county offices (if we omit the offices of coroner and surveyor, because of the lack of interest shown in their election, even when there were more candidates than one in the field).

Table VIII shows that in ninety-one instances out of 218 the first candidate on the primary ballot won; in 126 instances other candidates won and in one instance there was a tie vote. Only where there were but two rival candidates did the first man on the ballot seem to have a decided advantage over others.

TABLE VIII.—*Showing the number of instances in which the first, and each of the following names on the ballot were successful in the Republican contests for all county offices except coroner and surveyor.*

No. of candidates	First man.	Second man.	Third man.	Fourth man.	Fifth man.	Sixth man.	Seventh man.	Eighth man.
Two	62	50	.....	.....	.....	.....	.....	.....
Three	20	15	16	.....	.....	.....	.....	.....
Four	7	7	5	9	.....	.....	.....	.....
Five	1	3	3	5	2	.....	.....	.....
Six	1	1	3	1	0	2	.....	.....
Seven	0	1	0	2	0	0	0	.....
Eight	0	1	0	0	0	0	0	0

* One tie between first and second men in Price county.

The Democratic primary did not offer enough contests so that a study of the winning candidates could be made.

There were 55 Republican contests in the various districts for the election of assemblyman and the result is shown in Table IX.

TABLE IX.—*Republican nominations for assemblymen—Successful candidate.*

Candidates.	First place.	Sec nd place.	Third place.
Two	22	15	...
Three	6	5	4
Four	1	1	1

Whatever advantage certain candidates may have enjoyed in the last primary election by reason of the alphabetical arrangement of names on the ballot, will not arise in the future, on account of the amendment of the primary election law of 1909 which provides for the rotation of names.

V. What is the attitude of the electorate toward candidates not selected at party primaries?

At the regular election, November, 1908, there were independent candidates for twenty-eight offices. Almost all of the independent candidates were men who had been defeated in the primary when they were candidates for the Republican nomination. In all cases except one they were also defeated at the regular election and usually the second defeat was a decisive and overwhelming one. The one independent candidate who was elected was not a candidate at the primary but came out after the primary election. The fact that defeated candidates at the primary had no better success at the general election as independent candidates shows the willingness of voters to abide by the result of the primary.

VI. To what extent are city populations disproportionately represented at the primaries, and to what extent do they control nominations?

It has been argued that since farmers are usually a long distance from polling places, and since the primaries are held at a busy season for them, the rural interests are likely to be underrepresented in the primary system of nominations. We show elsewhere* that it is agreed that, thus far at least, there has been no tendency for cities to secure more than their share of offices,—that in fact the reverse appears to be the case. It is advisable, however, in view of the prevalent opinion as to the country vote, to present statistics on this subject. The following table shows that in cities 11.48% of the population attended the primaries, while 9.76% of the population turned out elsewhere. For the state as a whole, 10.5% attended. Of the total vote, 47.26% was cast in cities, where population was 43.23% of that of the state as a whole.

TABLE X.—*Showing distribution of population and of primary votes between city and country.*

	Population, 1905.	Primary vote, 1908.	Per cent of vote to population.	Per cent of total population.	Per cent of total vote.
Cities	963,670	110,672	11.48	43.23	47.26
Villages	143,131	20,966	14.64	6.43	8.95
Rural	1,122,148	102,542	9.13	50.34	43.79
Village and rural	1,265,279	123,508	9.76	56.77	52.74
State	2,228,949	234,180†	10.50	100.00	100.00

† The figures in this column represent the returns for sheriffs. It will be noted, that the total vote for the state is here given as 234,180 whereas elsewhere we give the figure 234,293. The latter is the corrected figure. Table VII was prepared before the inaccuracies of the county returns were corrected. Inasmuch as the percentages would not be materially affected, it was not deemed necessary to reconstruct the table upon the basis of the revised returns.

* See above, page 264.

The Constitutionality of the Primary Election Law.

The constitutionality of the Primary Election Law is now awaiting the judgment of the Supreme Court of the state, the case of *The State of Wisconsin ex rel. A. B. Van Alstine vs. James A. Frear, Secretary of State, and A. H. Dahl, State Treasurer, of the State of Wisconsin* having been appealed from an order of the Circuit Court for Dane County, Hon. Martin L. Lueck, Judge, presiding, dated November 22, 1909, sustaining separate demurrers to each of the five causes of action alleged in the complaint. Inasmuch as this case involves questions which are fundamental in the defense of the primary not only in Wisconsin, but in other states as well, we give, here, a resume of the case as it now stands.

Through his attorneys, Lehr and Lamb, the plaintiff, Van Alstine, a citizen, elector, and taxpayer, brought an action to test the validity of the primary law (Chapter 451, Laws of Wisconsin, 1903). The law was asserted to be invalid on five grounds, to each of which grounds the defendants demurred, claiming that no one of them was sufficient to constitute a cause of action. Thereupon, the plaintiff moved for an order striking out as frivolous the demurrers to each of the five causes of action, and for judgment in favor of the plaintiff.

The court, however, after a hearing, sustained the demurrers, denying the motion for judgment, whereupon the attorneys for the plaintiff filed an exception to the order, and appealed the case to the Supreme Court where the matter now rests.

The grounds of action alleged, and the opinion of the court upon each are here briefly stated:

The first cause of action asserted the law to be invalid because of the provision by which it was submitted to the people for their ratification or rejection, which was claimed to be a delegation of legislative power. The court held, however, that the law was a complete law, notwithstanding that it was to take effect only upon the contingency of a favorable referendum. On this

point, judicial decisions are not harmonious, but for Wisconsin the precedents of *State ex rel. Att. Gen. vs. O'Neill,* 24 Wis. 419; *Smith vs. The City of Janesville,* 26 Wis. 291; and *in re incorporation of Village of North Milwaukee,* 93 Wis. 616 were held to be conclusive.

The second cause of action was the failure to publish the statute after ratification by the voters. The necessity for this depended upon the same question, whether or not the law was a complete law before ratification. The conclusion against the first cause of action, accordingly, involved a similar conclusion against the second cause of action.

The third ground of action was the claimed abridgment of the constitutional right of the people peaceably to assemble and consult for the common good. The court, however, held that the direct primary did no more than to remove a particular encouragement to such assemblage.

The fourth cause of action charged that the limitation of the number of signatures which could be affixed to primary nomination papers infringed the privilege of electors of freely expressing their preferences for candidates. In the opinion of the court, however, no substantial right was restricted, and the limit was imposed only upon one of many forms of expression of preference, a variety of forms of endorsement still remaining open. It has been uniformly held that general elections are subject to reasonable legislative restrictions, and the power to control the official ballot carries with it the authority to prescribe reasonable conditions that must be complied with before a candidate is entitled to have his name appear upon the official ballot.

The fifth ground of action consisted of the contention that the primary law provided a method of selecting United States senators contrary to that provided in the constitutions of the national and state governments. It was held, however, that this contention was incorrect, the primary serving in this case only to provide an advisory vote, amply warranted by the constitutional right of the people to petition the government, or any branch of it,—in this instance the legislative branch.

* Not including scattering vote at general election.

The following tables show the vote for all county officers at the primary and at the general election. The first column showing the number of candidates gives a measure of the interest taken in the primary by office seekers. The party primary vote is large or small as compared with the general election vote according to the number of candidates for office. The second column gives the vote for the nominee; the third gives each party vote at the primary. The fourth column, which gives the per cent each nominee's vote was of the total party vote shows in how many cases the successful candidate was elected by a plurality, majority, or practically unanimous vote. The fifth column shows the total party vote at the general election in all cases where a party candidate was nominated at the primary; and the sixth column gives the per cent the primary vote was of the general election vote. In the last column is the scattering vote at the general election. This scattering vote is due to the fact that voters have in such cases written in names, often the names officially appearing on opposing ballots, these votes, according to law, not being counted for the regular candidate of that name.

In some cases the majority of the votes of a party at the primary were cast for a given person, whose name could not, nevertheless, be placed upon the ballot at the general election as the party nominee, owing to the fact that he had not filed a nomination paper, and had failed to receive at the primary as many votes as the number of signers required for a nomination paper.

In tables XVII to XXIV it will be found that where there were no candidates at the party primary the fact is sometimes indicated by a blank and sometimes by 0. It should be explained that the blank is used only when there were no votes, even scattering, on the ticket of the party in question for the county officers indicated, while the cipher indicates scattering votes but no candidates or nominee.

Tables XXV and XXVI give the vote by precincts for United States senator, and for sheriffs. Attention is called, in this connection, to the tabulation, by precincts, of the primary vote for governor in 1906, published by this Bureau in the Blue Book of 1907. There was no contest for this office in the dominant party in the 1908 primary.

TABLE XVII.—*County Officers—County Clerk.*

Counties.	Democratic.						Prohibition.						Republican.						Social Democratic.						Scattering vote at November election.
	Number of candidates.	Vote of nominee.	Total vote of Democratic party.	Per cent nominee's vote is of total.	Vote at regular election.	Per cent primary vote is of general election vote.	Number of candidates.	Vote of nominee.	Total vote of Prohibition party.	Per cent nominee's vote is of total.	Total vote at regular election.	Per cent primary vote is of general election vote.	Number of candidates.	Vote of nominee.	Total vote of Republican party.	Per cent nominee's vote is of total.	Total vote at regular election.	Per cent primary vote is of general election vote.	Number of candidates.	Vote of nominee.	Total vote of Social Democratic party.	Per cent nominee's vote is of total.	Vote at regular election.	Per cent primary vote is of general election vote.
